

Antonio Toesca, MD

Dr. Antonio Toesca graduated in **Medicine at the University of Milan Bicocca** in 2001 and became specialist in General Surgery Cum Laude in 2007 at the same University.

Since 2007, focuses his activity on **breast diseases and breast surgery** in the Division of Breast Surgery at European Institute of Oncology (IEO).

In 2008 he was the holder of a research project of the "Italian Association for Cancer Research" (AIRC) to develop the technique of **"Intraoperative Radiation Therapy for Early Breast Cancer."**

He regularly uses advanced methods of care as the **"ROLL" for the detection of non-palpable breast lesions**, breast conservative surgery techniques associated with plastic reshaping and nipple-sparing mastectomy, routinely cooperating with the team of plastic and reconstructive surgery in order to obtain the best aesthetic results. He works actively in the development of new techniques and indications for sentinel lymph node biopsy.

Member of Educational Committee of "Italian School of Breast Disease" with the aim of spreading widely the Italian senology culture encouraging the timely transfer of research to clinical practice, training doctors on the most innovative options for prevention, diagnosis and treatment.

Member of the Editorial Board Members of *Journal of Tumor* (ISSN 1819-6187), a peer reviewed journal with a higher standard to serve experimental and clinical oncology.

He obtained the **certificate from the General Medical Council** of the United Kingdom of "Full and Specialist Registration".

He is principal investigator of scientific retrospective studies, author and co-author of scientific publications in international journals and co-author in text book of General Surgery.
